About CBD Guangzhou 关于中国建博会（广州）

The China (Guangzhou) International Building Decoration Fair, hereinafter referred to as "CBD Guangzhou", was founded in 1999 and has been held consecutively for 26 years. CBD Guangzhou almost includes all top brands from China's building and decoration industrial chain, known as the "Debut Platform for Champion Enterprises".

This year, the 27th CBD Guangzhou will be held on July 8-11, at the Canton Fair Complex, Guangzhou. Spanning with an exhibition area of over 300,000 square meters, 2,000 exhibitors, 200,000 professional visitors from over 110 countries and region, CBD Guangzhou 2025 is expected to be the biggest home furnishing and building decoration fair in the world.

In 2025, CBD Guangzhou upgrades its layout into the "Three-Ecology" strategic framework of INTERIOR, EXTERIOR and MATECH, showcases home furnishings, smart home technology, doors and windows, bath and sanitary ware, materials, hardware, machinery, and coatings within a collaborative environment designed to spark innovation and facilitate meaningful industry connections.

The INTERIOR ecology champions "Customization + Design" with smart home technologies and intelligent systems representing the pinnacle of modern interior innovation.

The EXTERIOR ecology delivers comprehensive solutions for outdoor living spaces, recognizing that exterior environments now demand the same attention to detail as interiors.

The MATECH ecology presents transformative advances in materials, hardware innovations, and precision machinery that bridge industrial capability with refined aesthetic outcomes.

JIECANG, founded in 2000 in Zhejiang Province, China, was listed on the Shanghai Stock Exchange in September 2018. We specialize in developing, producing, and distributing linear actuator products. Our motto, "Technology Drives intelligent Life," reflects our commitment to innovation in various sectors such as intelligent office, medical care, smart home, and industrial automation. Especially in the Commercial and Home Height-Adjustable Desk Segments: JIECANG has pioneered industry standards for DC electrical linear actuators and height-adjustable tables in China, actively contributing to the establishment of standardized processes. Our global presence includes subsidiaries and factories in Asia, Europe, and the USA, covering 600,000 square meters and employing over 4,000 people. In 2024, we achieved a turnover of 3.6 billion RMB.

Commercial Market: As a key contributor to drafting industry standards for height-adjustable desks, JIECANG offers a comprehensive and highly modular product platform. Customers can flexibly combine our extensive range of modules and accessories to create desk configurations tailored to their specific needs, suitable for various application scenarios. JIECANG supports largescale, unified deployments, providing professional, complete desk solutions that meet multiple requirements including structural framing, wiring standards, and visual consistency. Home Market: JIECANG provides standard products covering all key home segments, such as gaming desks. For users with unique requirements, we offer full custom desk design services. This incorporates ergonomics, accessory selection guidance, spatial aesthetics, and smart operation to create a personalized smart home experience.

Our group AIPU SAFE was founded in 1991, it is manufacturing conglomerate with a core focus on safes. After years of growth, it has emerged as a leading power house in the security industry, research encompassing and development manufacturing, and sales.

Advanced Fingerprint Sensor With Rapid And Precise Recognition Less Than 1S

This fingerprint safe features fast and secure verification, continuously learning about your fingerprint and adapting to the positions of your fingerprints.

Patented Unique Locking Bolt Design

Providing enhanced anti-pry performance compared to traditional basic safes.

When prying the door, it will deform slightly but the vertical guard will catch on the head of the door frame tightly, causing the bolt to remain engaged and preventing the safe from opening.

3 Ways To Open The Safe

You can use fingerprint scanner or digital keypad to open the safe. Additionally, it comes with two backup keys in case you forget the passwords.

- Passcode
- Backup Keys
- Fingerprint

In 2009, Gaston was officially established in Zhouzhuang Town, Jiangyin, Jiangsu, with a modern factory spanning 200,000 square meters of independently owned property. The main production equipment is imported from Spain and Germany, and the company strictly adheres to the ISO9001 international certification system for management and production.

Multiple inspection procedures are implemented according to international quality standards, making Gaston one of the earliest global brands to independently design, develop, and manufacture aluminum furniture. Leveraging the strong advantages of its parent group, Gaston has integrated the entire upstream aluminum industry chain. Today, it exclusively supplies aluminum home furnishings to internationally renowned five-star hotels, restaurants, luxury cruise ships, naval vessels, schools, hospitals, and more.

Gaston's aluminum furniture innovatively employs technologies such as 3D integrated wrapping, aluminum-wood fusion bonding, aluminum-paint solid coating, and aluminum-leather soft bonding. These techniques preserve the warmth and aesthetics of wood, creating a beautiful, eco-friendly, and long-lasting lifestyle while fully utilizing the advantages of metal—being "fireproof, waterproof, termite-proof, zero-formaldehyde, and corrosion-resistant." Currently, Gaston offers a full range of customized aluminum furniture, including wardrobes, kitchen cabinets, wine cellars, bathroom vanities, and whole-house solutions.

YESWOOD

YESWOOD is one of China's most renowned solid wood furniture brands. Founded in 2010 and now employing over 2,000 professionals, we integrate design, production, and sales to deliver high-quality furniture and home essentials, empowering everyone to create an accessible and fulfilling living experience.

Specializing in solid wood craftsmanship, YESWOOD offers over 20+ collections and 2,500+ SKU, spanning diverse aesthetics: from Japanese minimalism and Nordic simplicity to French vintage charm, modern luxury, retro elegance, Italian contemporary, and refined Neo-Chinese styles. Our products cover every corner of the home—living rooms, bedrooms, studies, dining areas, children's rooms—and are complemented by home accessories, mattresses, and custom furniture services.

Rooted in a human-centric design philosophy, we prioritize functionality, versatility, and timeless appeal. Each piece combines practical storage solutions, adaptable designs, and style-agnostic collections to harmonize with any interior theme. Whether enhancing small spaces or redefining grand homes, our creations aim to simplify styling while celebrating the natural beauty of wood. Driven by the vision to make "well-crafted living attainable for all," YESWOOD continues to innovate, offering thoughtfully designed solutions that bridge tradition and modernity, individuality and universality.

ZBOM

Founded in 1998, ZBOM HOME is a pioneer in China's kitchen cabinet industry. Now, ZBOM HOME focuses on the research and development, design, production and sales of the whole custom home. Starting from the brand concept of "knowing more about life", with the advantages of customized design and service of the whole family, we provide hundreds of millions of families with whole home solutions from the kitchen to the whole house.

As a professional home furnishing brand in the field of whole home customization, ZBOM HOME provides people with the integrated design, manufacturing and delivery business of the whole kitchen, whole house customization, wooden door wall panels, and finished home accessories, and has seven major production bases in the country, introduces foreign intelligent manufacturing equipment, integrates high-quality supply chains, and ensures that every link of products from design, production, installation to service is based on human scale and life as the core, creating ideal home products for global families.

Taian Zhanhong Woodworking Machinery Co., Ltd. is one of the largest manufacturers of vacuum camber film covering machines and sheeting machines in China. We made woodworking machine since 1994. Close to national highway 104 and Jinghu expressway, we have more than 80,000 square meters of land and over 200 employees including superior designers.

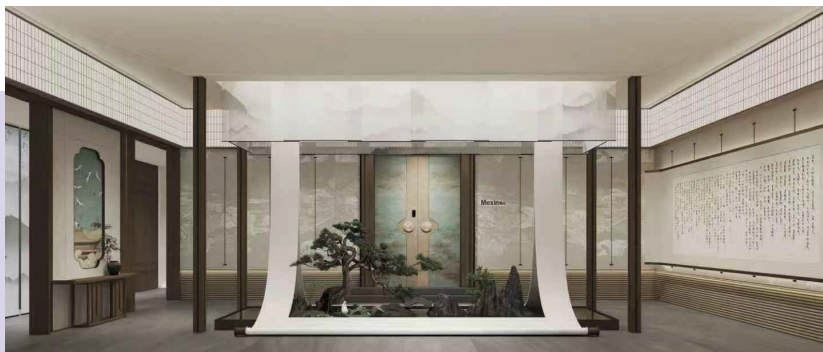

We are one of the few manufacturers who can develop TM2680 series curved surface vacuum hot membrane presser successfully in China at present, which is appraised as the "famous brand product" by National Woodworking Machinery Quality Supervise and Check Center.

As one of the leading door manufacturers in China, which established in 1989. Through 30 years of development, MEXIN has established a complete organizational with 6,000 employee and including technique research, manufacture, marketing and after service departments. Main products cover fire rated doors, safety security doors, commercial doors, Interior MDF doors, solid wooden doors,

automatic garage doors and industry doors. By positive technique research and international market exploration, MEXIN have successfully entered to over 50 countries. Such as US, UK, European countries, Middle East and South Asian countries, and in good reputation. It helps MEXIN keeping stable business relationship with customers in these countries and regions.

In 2007, the "Xingcheng" brand was established in Guangzhou. It was the first enterprise to introduce high-quality sliding doors to China and was hailed as a leading figure in the Chinese cabinet door industry. In 2011, with advancements in product technology and changes in the market environment, we kept pace with industry trends and invested in a customized wardrobe vacuum forming

sliding door production line. The "Xingcheng" brand became renowned nationwide. In 2018, the company independently developed an MDF electrostatic powder spraying production line. In 2021, we obtained the international quality management system certifications: ISO9001, ISO14001, and ISO45001, as well as SGS and FSC.

In 2023, we realized the integration of doors, walls, and cabinets: applying electrostatic powder spraying technology to cabinet doors, room doors, wall panels, arcs, and cabinet bodies, with an expansion into the office furniture. Xingcheng has production bases in Guangzhou and Foshan, focuses on healthy home solutions, continuously innovates, and is committed to becoming a high-tech, eco-friendly enterprise that promotes ecological and healthy living environments.

Sunvega
三 | 维 | 家

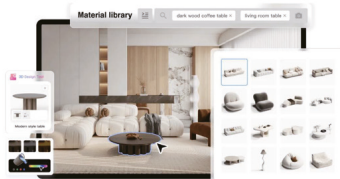

Founded in 2013, Sunvega Information Technology has built SaaS solutions for the home furnishings industry, covering design, manufacturing, and CNC machining. These solutions are powered by three core self-developed engines: AI Cloud Modeling, AI Cloud Rendering, and 3D Vector AI.

The company continues to invest heavily in R&D, with 294 patents filed and 259 copyrights granted. Sunvega serves over 20,000 businesses in the home furnishings sector, and more than 9,000 manufacturers use its cloud-based manufacturing systems.

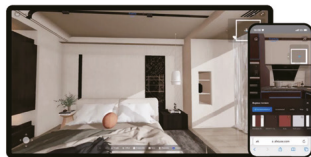

The company has secured investments across four funding rounds from leading investors, including SoftBank China, GF Xinde Investment, Red Star Macalline, Alibaba, CAS Investment, and Inovance Technology. As Sunvega expands its global presence, its wholly owned subsidiary JEGA now leads the company's international operations, with more than 20 local teams established overseas to provide dedicated services.

Dongguan Huali Industrial Co., Ltd. (abbreviated as Huali Stock, stock code: 603038.SH), established in 1995, was listed on the main board of the Shanghai Stock Exchange in 2017. Starting from the decorative composite materials sector, the company has adhered to principled innovation and upheld the spirit of craftsmanship over three decades. It has evolved into a comprehensive holding enterprise encompassing four major business domains: home building materials, smart water services, membrane filtration materials, and industrial digitalization and intelligentization.

The home materials division primarily produces edge banding and decorative panels, mainly used for panel furniture, interior decoration, and commercial space design. As a pioneer with independent intellectual property rights in edge banding manufacturing, Huali Stock has played a leading role in formulating critical industry standards for edge banding in China. Renowned for its R&D capabilities and innovative strengths that rank among the industry's forefront, the company delivers professional design solutions and high-quality home materials globally. Its production bases are strategically located in Dongguan, Foshan, Jiaying, Chengdu, Huanggang, and Wuhu.

Deep Comfort, Inspired Living

PAIYA Windows & Façades is a benchmark brand in China's aluminum door and window systems industry, with 35 years of dedicated expertise in research, development, and manufacturing. In 2013, PAIYA became the founding Chair of the Guangdong Aluminum Door & Window Committee and was elected Chair of the Provincial Door Industry Association in 2022. Recognized as a National High-Tech Enterprise and Industry Technology Pioneer, PAIYA continues to lead with innovation and integrity.

Featured for four consecutive years on CCTV's The Growing of a Great Brand, PAIYA launched its groundbreaking "Deep Comfort" design philosophy in 2023—redefining standards in thermal performance, safety, and human-centric design. In 2025, with the rollout of Premium Strategy 4.0, PAIYA achieved No.1 nationwide in high-end door and window sales for three consecutive years. Having served over 10 million households globally, PAIYA integrates smart manufacturing with cutting-edge technology to drive consistent breakthroughs in comfort, security, and architectural aesthetics. As a champion of Chinese craftsmanship on the global stage, PAIYA is accelerating the evolution of modern living and elevating the international reputation of China's fenestration industry.

Jiangxi Fenfa Group Co., Ltd. is located in Anyi Industrial Park, Nanchang City, along the Changjiu Economic Belt. It covers an area of 180 mu and has 80,000 square meters of modern standard factory buildings. It has now developed into the largest R & D and production center for construction silicone sealants, sealing strips, and door and window hardware accessories in the country, and is the first "one - stop" supplier of door, window, and curtain wall accessories in China.

Fenfa Group is among the top 500 building materials enterprises in China, one of the top 100 most growth - oriented building materials enterprises in China, and one of the top ten brands of door, window, and curtain wall hardware in China. It is a designated production enterprise for building door, window, and curtain wall accessories in China, and an approved enterprise for the production of silicone structural sealants for construction.

FS5000

Silicone Weatherproof Sealant

Storage and shelf life
Non-dangerous product, should be stored in a dry and shady place, temperature 4°C-27°C

Colors
Black, white, grey, transparent or customer require

Packaging
590 ml/sausage

Standard
JC/T 982-2001

Feature

- One component, easy to use and has good thixotropic extrusion
- Neutral curing, suitable for most building materials without adverse reactions
- For normal stretching and shear deformation, the performance remains unchanged after the curing, elastomer forms can fit load interface a 35% displacement ability.
- Excellent weatherability, service life more than 30 years.
- Excellent cohesiveness with the vast majority of construction materials.
- Good compatibility with other neutral silicone adhesives.

Application

All kinds of glass curtain wall weather resistant sealing

Joint sealing of roof construction

Weather proof sealing of metal and aluminum plastic panel of concrete, plastic panel-metal

Joint sealing of concrete, plastic and metal

Other uses

The following conditions can't be used or constructed

- Material surface temperature below 4°C or over 40°C
- Paint surface, maybe due to paint peeling or oxidizing lead to adhesive failure.
- Structural bond sealing of curtain wall engineering
- Dew or wet surfaces, continuous soaking place or wet places throughout the years.
- All materials that ooze grease, plasticizers or solvents, and vulcanized or partially vulcanized rubber lining tapes without airtight places.
